# Save System32

Final Proposal for Project 4
Dat Ngo
Art 101 - Section 01

Elevator Pitch

Save System32 is a chaotic arcade-style game where players dodge incoming Recycle Bin icons to protect a fragile System32 file on a retro Windows desktop. The game combines p5.js mechanics with JavaScript browser actions to deliver a nostalgic and fast-paced experience, evoking the visual chaos of early 2000s computer desktops.
